

About (Elevator Pitch):

I'm a Computer Science Graduate from Ain Shams University with a CGPA of 3.76. I'm a Software Engineer with a strong interest in Front-End Development and building smooth, responsive, and user-friendly web interfaces.

I focus on creating clean and interactive user experiences, and I enjoy turning ideas into real, working websites.

I also have a good understanding of how the Back-End works, and I'm currently learning more so I can become a Full-Stack Developer in the future.

I'm always looking to improve my skills, solve real problems, and build useful software.

I'm open to opportunities where I can grow as a developer, work on exciting projects, and be part of a motivated team.

Feel free to reach out if you're hiring or open to collaboration!
